19. MY PROVINCE COVERS THE COSTS OF ROUTINE SNFL TESTING THROUGH THE SAME PROCESS AS OTHER STANDARD BLOOD TESTS

20. IF YOUR PROVINCE DOES NOT DEFRAY THE COSTS OF ROUTINE SNFL TESTS, ARE YOU AWARE OF THE TEST BEING REIMBURSED BY THE PUBLIC HEALTHCARE SYSTEM IN CERTAIN LOCATIONS?

# CONCLUSIONS

- Most could use sNfL in addition to other tests to monitor patients in various scenarios
  - Best to use after diagnosis, about every 6 to 12 months, or to monitor patients during DMT switch or de-escalation/stopping
- Many feel uncertain about how to use sNfL optimally
- Majority welcome education about how to use sNfL
  - Mostly through educational peer events and conferences, as well as in Canadian treatment optimization guidelines
- There is poor access to sNfL across the country outside of pharmaceutical company support at this time
